Introduction

- Winston Churchill once said that we shape our homes, and then our homes shape us
- Humans have been decorating their living spaces since the beginning of our time, and our environments play a crucial role in our day to day lives
- Today's guest speaker, Hallie Jackson, is a veteran in the field of interior design, and has prepared a list of design principles that she cites as her keys to success

Body

- Although she had lived in Indiana most of her life, she attributes the majority of her design inspiration to her experiences while traveling
- Florida towns such as Captiva and Marco with European summer architectural styles influence her work the most
- She now does contract work for an international design firm named HOK, using space, color, unique materials, and light to create healthy and uplifting environments
- In fact, she just arrived here after completing a contract to work on Kanye West's new villa in the Florida keys!

Conclusion

- From office spaces to our own bedrooms, interior design plays a huge role in the way our living spaces affect us, and
- hopefully we can all incorporate at least one of Hallie's design principles in our daily lives
- Without further ado, please give a warm welcome to today's guest speaker, Hallie Jackson.
